

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

What is claimed is:

1. **(Original)** A land based seismic data collection unit comprising:
 - a. a case having a wall defining an internal compartment;
 - b. at least one geophone disposed within said case
 - c. a clock disposed within said case;
 - d. a power source disposed within said case; and
 - e. a seismic data recorder disposed within said case.
2. **(Original)** The unit of Claim 1, wherein said unit is self contained and requires no external communications or controls during recording.
3. **(Original)** The unit of Claim 1, wherein the case is watertight.
4. **(Original)** The unit of Claim 1, wherein the case comprises a first plate having a first periphery and a second plate having a second periphery, wherein the plates are joined along their peripheries by said wall.
5. **(Original)** The unit of Claim 1, wherein said case is defined by at least one substantially flat wall.

6. **(Currently Amended)** The unit of Claim 5, wherein said at ~~lest~~ least one geophone is disposed adjacent said flat wall.
7. **(Original)** The unit of Claim 1, wherein the case is defined by at least one plate.
8. **(Original)** The unit of Claim 7, wherein said at least one geophone is disposed adjacent said plate.
9. **(Original)** A land based seismic data collection unit comprising:
 - a. a case having a wall defining an internal compartment;
 - b. at least one geophone disposed within said case
 - c. a clock disposed within said case;
 - d. a power source; and
 - e. a seismic data recorder disposed within said case.
10. **(Original)** The unit of Claim 9, wherein said unit is self contained and requires no external communications or controls during recording.
11. **(Original)** The unit of Claim 9, wherein the power source is disposed within the case.
12. **(Original)** The unit of Claim 9, wherein the power source includes a fuel cell attached to the case.
13. **(Original)** The unit of Claim 9, wherein the power source includes a solar cell attached to the case.
14. **(Original)** The unit of Claim 1, wherein the wall is non-spherical.

15. **(Original)** The unit of Claim 1, wherein the wall is non-hemispherical.
16. **(Original)** The unit of Claim 1, wherein the case defines an external surface, and the external surface is provided with ridges to enhance coupling of unit with the earth.
17. **(Original)** The unit of Claim 16, wherein the case defines an external surface, and the external surface is provided with at least one spike to enhance coupling of unit with the earth.
18. **(Original)** The unit of Claim 1, further comprising
 - a. three geophones disposed within said case; and
 - b. a compass.
19. **(Original)** The unit of Claim 1, further comprising
 - a. a tilt meter disposed within said case.
20. **(Original)** The unit of Claim 1, further comprising a GPS location transducer.
21. **(Original)** The unit of Claim 1, further comprising a radio unit.
22. **(Original)** The unit of Claim 1, wherein said clock is a crystal clock.
23. **(Original)** The unit of Claim 1, wherein said clock is a rubidium clock.
24. **(Original)** The unit of Claim 1, further comprising an external connector in electrical communication with at least one of said geophone, clock, power source and seismic recorder, said connector extending through the wall of said case and disposed within said wall so as to be set in from the external surface of said wall.

25. **(Original)** The unit of Claim 24, further comprising a water tight, pressure resistant cap disposed over said external connector.

26. **(Original)** The unit of Claim 1, further comprising a radio frequency identification.

27. **(Original)** The unit of Claim 1, wherein said power source provides all power to the unit while deployed.

28. **(Original)** The unit of Claim 1, wherein said power source is a lithium-ion battery.

29. **(Original)** The unit of Claim 1, further comprising an internal control mechanism for controlling all functions of the unit while deployed.

30-68. **(Cancelled)** Please delete.

69. **(Currently Amended)** The A seismic data collection unit of claim 9, further comprising:

a. at least four seismic data geophones disposed within said case.

70. **(Original)** The seismic data collection unit of claim 69, wherein said at least four geophones are arranged in a tetrahedral configuration.

71. **(Currently Amended)** The A seismic data collection unit of claim 9, further comprising:

a. at least five geophones disposed within said case.

72-90. **(Cancelled)** Please delete.

91. **(Currently Amended)** The A seismic data collection unit of claim 9, further
comprising:

a. at least four seismic data geophones disposed within said case, wherein at least
three of said geophones are disposed adjacent one another and at least one geophone is disposed
in a location within said case removed from said other geophones.

92. **(Original)** The seismic data collection unit of claim 91, further comprising a case in
which the at least four seismic data geophones are disposed, wherein said at least three geophones
are disposed in said case to maximize detection of seismic energy and said at least one geophone is
disposed in said case to maximize vibration of said case by said removed geophone.

93-108 **(Cancelled)** Please delete.
